Silicone Roof Restoration

If your roof is beginning to wear or leak, you might think that installing a new roof is your only option. But before you commit to a complete “rip and replace,” you should see if the roof qualifies for a less costly alternative – a roof restoration system.

Proven lifecycle benefits

A recent study by building envelope consulting firm Trinity ERD compared the life cycle costs of a conventional roof replacement vs. a roof restoration with Industrial Grade Silicone White Roof Coating. The firm’s analysis found that over 40 years, the silicone roof restoration would deliver significant cost advantages.

75%
 lower lifecycle costs vs. roof replacement

Roof restoration vs. replacement:

4X

Four-times the cost savings

Provides energy savings up to 50%*

Supports cool roof coating rebates and tax incentives

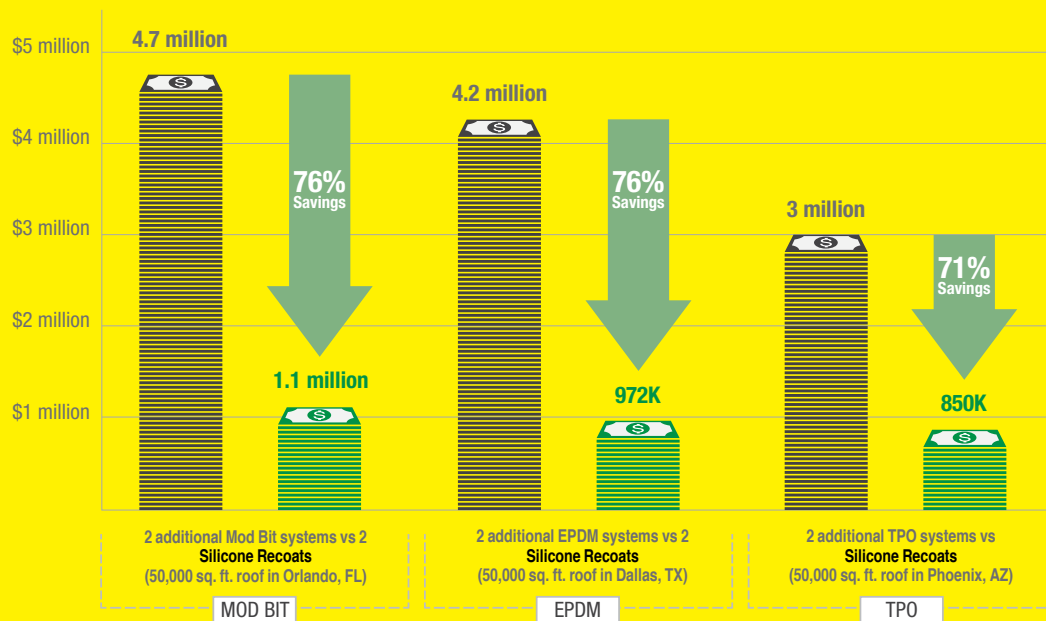

Prevents repair-related disruptions to the building and its occupants

Reduces landfill waste and impact on smog/air quality
